

II level Master Training Program in
**Development,
Manufacturing and
Authorization of
Biopharmaceuticals**

Today, thanks to the development of new technologies, the way in which new drugs are designed and manufactured is undergoing radical transformations. Therefore, pharmaceutical companies are continuously looking for highly qualified experts in the field who are also able to collaborate effectively with academic institutions and regulatory bodies.

Do you want to improve your knowledge to have new opportunities for your future?

Discover the 2nd level Master in Development, Manufacturing and Authorization of Biopharmaceuticals, entirely delivered in English, organized by the Department of Life Sciences of the University of Modena and Reggio Emilia, in collaboration with the Marco Biagi Foundation, to train experts in this field.

The main objective of the master, which includes an internship at selected partners, is to open specific professional opportunities such as manager/director of laboratories with biotechnological or pharmaceutical characterization, coordinator of research and development programs in biotechnology applied to human health, expert in the management of regulatory aspects of the introduction of new drugs on the market.

- ❖ The course is designed for recent graduates with solid skills in pharmaceutical and industrial biotechnology and/or bioengineering, but also for professionals in the field of research and development of new drugs who are interested in deepening their knowledge in the field of design and production of biopharmaceutical products.
- ❖ Classes will start in April 2022.
- ❖ The 240 hours of frontal teaching will be fully usable also via streaming.
- ❖ The master offers to all enrolled students a curricular Internship of 375 hours at selected partners.

Send an email to request more information and receive the master's brochure.
